

GRAZED BY ANIMALS

INFORMATION NOTE

Dadford Road Campsite and Parking

This is a Working Farm, with Livestock.

Some times, to keep the grass down the field is grazed by animals.

There is a risk, albeit small, by camping where animals have been.

Farm animals may carry a number of infections that can be harmful to people. In particular to children under five and Pregnant women; who are more vulnerable to infection and can be more seriously affected.

Touching animal droppings, fences and other areas can therefore possibly lead to infection. Consider also that boots, shoes, pram wheels etc may also have come in contact with animal droppings.

Regular washing of hands thoroughly with soap & water is essential.

Always thoroughly wash your hands before eating and drinking.
